

Below is the list of Hampshire sires utilized in the validation process for the Hampshire DNA Breed Profile Test, which includes Hampshire breed composition and Hampshire color. These animals were selected due to their influence on the breed (number of litter/son/daughter records) or to represent the diversity in the population (show/exhibition, commercial, “Old line”).

Note: Hampshire WGBC is the Hampshire Whole-Genome Breed Composition percentage calculated from genotypic data collected using 10K gene marker chip technology.
